

## Built & Tested for the Highest Reliability

### Jasper Marine Proven Quality

When your marine engine is no longer seaworthy, the best way to restore its original performance, or better, is to install a JASPER fully-remanufactured engine. Who else would you trust? JASPER offers proven-quality marine products, remanufactured to the highest standards in the industry, with over 75 years of experience!

Every remanufactured engine from Jasper Marine is tested before it leaves the factory. Popular Complete Engines are live-run tested with recorded inspections on compression, vacuum and oil pressure readings. Complete Engines are also checked for proper lubrication to the rocker assemblies, and black-light tested for leaks.

JASPER Inboard and I/O Engines also receive a standard set of new marine parts, including valves, pistons, rings, bearings, gaskets and seals for performance reliability!

### Availability

Jasper Marine products are available through a large and growing network of branches and distributors, with immediate availability on popular engines, sterndrives, and outboard lower units to get you back on the water FAST!

### Environmentally Friendly

Purchase JASPER and reduce your carbon footprint. Our remanufacturing process breaks the cycle and wastes associated with raw material harvest and production, greatly reducing the emissions of greenhouse gases.

## Get Back on the Water **FAST!**

100% Associate Owned

## Reliable Performance for Peace of Mind

### Jasper Marine Quality Assurance

As a 100% Associated-Owned Company, our Associates are committed to producing the highest-quality products available in the industry. When you purchase a JASPER Remanufactured Engine, Sterndrive, or Outboard Lower Unit, you're getting peace-of-mind, added resale value for your boat, as well as trouble-free operation for years to come!

Every Jasper Marine product is backed by a nationwide transferable warranty, including 24/7 emergency warranty information (800-827-7455). For an even greater value, JASPER also offers an available Premium Service Plan for Inboard and I/O Engines.

If your boat's drivetrain is beyond simple repair, don't waste another minute of fun on the water. We have immediate availability on most popular applications. Ask your local marine dealer or service center about purchasing a high-quality Jasper Marine product and get back on the water **FAST!**

## Marine Engines (Inboard and I/O)

### Head Surfaces

All surface finishes are machined and inspected to ensure proper gasket seating.

### Camshafts

Added machining improves lifter rotation and reduces camshaft wear. Cast iron camshafts are Parkerized, a process which promotes superior oil adhesion.

### Crankshafts

Crankshafts are precisely machined to dimensional and finish specifications for optimum performance.

### Timing Components

Most marine applications will include the correct marine-style oil pan and timing cover.

### Valves

100% NEW valves and keepers ensure long-term durability and performance.

### Pistons

100% NEW pistons are installed for the best performance and reliability.

### Cylinders

Cylinders are bored and honed to OEM dimensional and finish specifications for smooth piston travel and optimum sealing.

### Live-Run Testing

Popular Complete engines are live-run tested for performance reliability.

# JASPER® Marine Products... Maximize Your Time on the Water!

100% Associate Owned

### Nationwide Parts & Labor Warranty:

**Sterndrives/Outboard Lower Units - 2 Years**  
**Complete Engines - 2 Years**

### Installation Kit

Ask your installer about a value added install kit with your Marine Inboard or I/O Engine purchase!

## Sterndrives & Outboard Lower Units

### Thorough Inspection

The shafts and clutch are carefully inspected to ensure performance reliability. All tolerances are checked for smooth, accurate unit operation.

### New U-Joints

All U-joints are replaced with 100% NEW, quality parts for smooth and quiet operation.

### Gears

All gears are carefully examined to ensure they meet, or exceed, the quality requirements of the original manufacturer and Jasper Marine.

### Wear Inspection

All parts are meticulously inspected for wear, and correct tolerances, to ensure long product life.

### Paint Protection

A durable nine-step, oven-baked paint process protects your drive or lower unit from the elements and keeps it looking pristine.

Every Jasper Marine remanufactured Sterndrive and Outboard Lower Unit receives (where applicable) all NEW bearings, gaskets, U-joints, seals, upper water pump housing and water pump impeller to ensure the performance reliability of your drive. (Because the upper drive shaft is not included on Evinrude and Johnson units, water pumps are not provided on these applications.)
